

## **Environmental Policy**

The Barbados Motoring Federation (BMF) is committed to the development of sustainable motorsport.

Scope: This policy applies to the BMF operational activities of both its sport and mobility divisions and serves as a document to be shared with its Member Clubs as an advisory policy.

Environmental objectives that the BMF commits to in order to see positive developments in sustainability are:

- Complying with all applicable regulatory requirements related to environment legislation and sustainability commitments.
- Ensuring that our staff and members are aware of the environmental impact of their work activities in order to reduce the impact of energy consumption.
- Work to reduce the environmental impact of our activities and reduce the impact of waste.

To meet the above commitments the BMF undertakes the following actions:

- Identify main sources of energy consumption and investigate which ones have potential for reduction.
- Identify ways to reduce waste and recycle.
- Promote sustainability and environmental awareness and involve external stakeholders in reaching the objectives.
- Annually reviewing our sustainability strategy, objectives, policies and practices.

The BMF policy is communicated to our member clubs and stakeholders and is shared on our website.

Signed

Andrew Mallalieu  
President
